Location: Da Nang

PROFESSIONAL SUMMARY

With over three years of experience developing websites using WordPress, WooCommerce, and Next.js, I bring strengths in SEO, performance optimization, and VPS-based deployment. I aim to deepen my expertise and contribute to high-quality web projects that deliver tangible value to businesses. I focus on building reliable web solutions that improve user experience and search engine visibility.

EDUCATION

2022 - 2026 **University of Technology and Education - The University of Danang**
Major: Information Technology

RESEARCH PROJECTS

2024 - 2025 **Remote Health Monitoring Wheelchair**

- Participated in research and development of a wheelchair system with remote health monitoring capabilities.
- Assisted with software development and data connectivity to track health indicators.

2023 - 2024 **Rehabilitation Glove for People with Mild Stroke**

- Participated in the research and development of a glove to support rehabilitation after a mild stroke.
- Assisted with control software development and sensor data collection.

WORK EXPERIENCE

2022 - Present **Webtop Website Design Co., Ltd.**
Web Developer

- Developed, customized, and optimized WordPress and WooCommerce websites for corporate and e-commerce projects.
- Built user interfaces and integrated features using Next.js, Tailwind CSS, and TypeScript.
- Configured and managed VPS infrastructure to deploy the company's website template system.
- Configured hosting, DNS, and SSL, and deployed websites to production environments.
- Improved website performance, page loading speed, and user experience.
- Performed SEO optimization and configured Google Search Console, Google Analytics 4, and Google Tag Manager.
- Managed code, deployed projects, and supported the development team.
- Delivered 10+ websites for clients across multiple industries.
